

AI Usage DISCLOSURE FORM

1. Team Details

Team Name: SRM_Team Ctrl Alt Elite_1

Project / Product Name: Agentic Code Intelligence

Organization / Institution (if any): SRM Institute of Science and Technology

Submission Date: 4 October 2026

2. AI Usage Declaration

Did your team use any Artificial Intelligence (AI) in developing this project? Yes / No

Yes

3. Purpose of AI Usage (Brief Details)

Idea generation / brainstorming: Helped discuss implementation and evaluation approaches.

Code generation or assistance: Assisted with targeted implementation, integration and refinement of retrieval and version-history features.

UI / UX design: Helped refine search controls, result explanations and error messages.

Content creation: Assisted with technical documentation and submission materials.

Data analysis: Assisted with benchmark verification, numerical consistency checks and interpretation of results.

Testing / debugging: Helped develop regression checks, resolve compatibility issues and review cross-platform verification evidence.

Other: The application uses pretrained embedding models for code retrieval.

4. Feature Origin Classification (Please add/delete based on the number of the feature)

1. Feature Name : Code search and version history

2. Self-Generated/AI-Generated/Both : Both

3. Description (AI tools/platform used, prompt used, output summary, modification):

AI tool: OpenAI Codex.

Prompt used (summary): Help refine retrieval routes, integrate Git-history search, improve CPU compatibility and verify evaluation results.

Output summary: Targeted code assistance for retrieval constraints, version filtering, runtime compatibility and benchmark verification.

Modification: We reviewed and tested the changes, retained the selected fusion approach and checked results against source evidence.

1. Feature Name : Search interface

2. Self-Generated/AI-Generated/Both: Both

3. Description (AI tools/platform used, prompt used, output summary, modification):

AI tool: OpenAI Codex.

Prompt used (summary): Help refine the interface, connect search controls to the backend and clarify results and unsupported requests.

Output summary: Assistance with interface implementation, version-selection controls, API integration and explanatory messages.

Modification: We reviewed and refined the interface and checked its behavior with the backend.

1. Feature Name : Testing and compatibility

2. Self-Generated/AI-Generated/Both: Both

3. Description (AI tools/platform used, prompt used, output summary, modification):

AI tool: OpenAI Codex.

Prompt used (summary): Help test retrieval behavior and investigate cross-platform compatibility issues.

Output summary: Assistance with regression testing, debugging and Windows compatibility fixes.

Modification: Team members ran the checks, reviewed the results and confirmed the corrected candidate on Windows.

5. Ethical & Compliance Confirmation

AI usage complies with guidelines and policies. **Yes**

No proprietary or copyrighted data misused. **I Agree**

6. Declaration & Sign-Off

Name of Team Representative: Devansh Singh

Role: Team Lead

A handwritten signature in blue ink, appearing to read 'Devansh Singh', is shown on a light-colored background.

Signature:
